Professional Summary

Backend-focused Software Developer with high proficiency in **Go and Node.js**, dedicated to architecting robust, clean, and maintainable systems. I possess a strong technical foundation for building complex full-stack applications, leveraging modern development workflows and AI-assisted tools to optimize the delivery of frontend interfaces in **React + Vite**. Driven by a commitment to continuous learning and adapting to the evolving technological landscape, with additional experience in **C# / .NET and Python**.

Technical Skills

Category	Skills
Backend (Primary)	Go, Node.js, TypeScript, Express.js, NestJS
Backend (Additional)	C# / .NET, Python, FastAPI
Frontend	React, Vite, HTML & CSS, Bootstrap, Redux Toolkit
Databases	MySQL, MongoDB, SQLite, SQL Server, GORM, Entity Framework
Tools & OS	Git, Linux, Bun, MinIO, JWT, AI-Assisted Development

Experience

IT Technician

UDELAR | *Montevideo, Uruguay* | 2021 – Present

- Configure and install hardware and software on university devices, ensuring proper maintenance of all IT equipment (routers, printers, etc.).
- Developed specific internal web services for the university using **Go and Node.js**, improving administrative workflows and system reliability.

Backend Developer (Freelance)

UDELAR Chemistry Departments | *Montevideo, Uruguay* | 2023 – 2024

- Designed, developed, and deployed backend systems using **Node.js and MongoDB**, focusing on data validation, REST API design, and production stability.
- Implemented a program to dynamically generate XML quiz files for the Moodle learning platform using **Python**, streamlining academic evaluation processes.

Featured Projects

Memewars

- **Tech Stack:** Go, Gin, GORM, SQLite, React, Vite, TypeScript.
- Application for creating rooms where users upload memes and vote for favorites. Implemented a high-performance Go backend and a React + Vite frontend served by the same binary.

Ravenkod

- **Tech Stack:** React, Vite, TypeScript, CSS, React Router, Bun.
- Landing page for a custom software studio featuring a Norse-forge inspired dark design with animated sections and runic details. Focused on high-quality visual fidelity and performance.

DashCord

- **Tech Stack:** React, Vite, TypeScript, Redux Toolkit, FastAPI, Python, MongoDB, JWT.

- Cross-platform desktop application for managing YouTube playlists. Developed a Python backend and integrated a custom Discord music bot with a modern frontend interface.

YourDelivery

- **Tech Stack:** C# .NET MVC, Entity Framework, SQL Server, HTML, CSS, JWT.
 - Package tracking and delivery management system with real-time order tracking, demonstrating proficiency in full-stack implementation using C# and SQL Server.
-

Education

ORT UNIVERSITY

- **Program:** Programmer Analyst | *Expected Graduation: July 2027*
- **Duration:** 2023 - Current

UTU - Universidad del Trabajo del Uruguay

- **Program:** Computer Science
 - **Duration:** 2018 - 2022
-

Languages

- **Spanish:** Native
 - **English:** Intermediate
