

Agustín Lasalvia

Junior Developer (Full Stack)

Contact Information

- **Phone:** +598 98 816 883
- **Email:** agus.blumenfeld13@gmail.com
- **Location:** Montevideo, Uruguay

Professional Summary

Highly motivated and results-driven **Junior Full Stack Developer** with a solid foundation in Computer Science and practical experience in backend development using **Node.js, JavaScript, Python, and C#**, complemented by emerging skills in frontend development with **React**. Eager to contribute to impactful software development, with a strong interest in continuous learning and actively seeking challenging Junior Developer positions where I can apply and expand my technical skills across the full stack.

Technical Skills

Category	Skills
Frontend	React, HTML, CSS, JavaScript
Backend	Node.js, Python, C#, REST APIs, System Integration
Databases	MongoDB, SQL
Version Control	Git (PRs)
Operating Systems	Linux
Cloud/APIs	Google APIs, AWS (Familiarity)

Experience

Backend Developer

- **Duration:** 2023 - 2024
- **Key Contributions:**
 - **2023 (Quitel Project):** Developed and maintained a comprehensive system for registration, pre-registration, form submission, and payment transactions using **Node.js, MongoDB, and Google API integrations (e.g., Google Drive)**, demonstrating strong **system integration** capabilities, in collaboration with the UDELAR Bioinformatics Department.
 - **2024 (Moodle Project):** Designed and implemented a program to dynamically generate XML files containing various question types for the Moodle 3 learning platform (quiz files) using **Python**, in collaboration with UDELAR Chemistry departments.
 - Applied knowledge of system architecture and database management (MongoDB) to ensure the stability and functionality of critical web applications, aligning with best practices for web development.

IT Support Technician - UDELAR

- **Duration:** 2021 - Current
 - **Key Contributions:**
 - **Managed and maintained** the hardware and software infrastructure for the administrative section, ensuring high operational efficiency.
 - **Configured and deployed** various network devices, including printers, PCs, and routers, to support daily administrative functions.
 - **Provided technical support** for both basic and specific software installations, resolving issues promptly to minimize downtime.
-

Education

ORT UNIVERSITY

- **Program:** Programmer Analyst
- **Duration:** 2023 - Current

UTU - Universidad del Trabajo del Uruguay

- **Program:** Computer Science

- **Duration:** 2018 - 2022
-

Languages

- **Spanish:** Native
 - **English:** Intermediate
